Commentary 2 | November 17, 2023:

The Healed Heart of Christmas

By Esther Baird, Author and CCA Parent

Christmas is supposed to be joyful, it's supposed to be a celebration. So why do we feel like we are slipping ever faster towards the edge of a cliff when the calendar flips to December? Is it just the longer to-do list? Is it a scheduling problem? Or does Christmas bring to the surface something that actually hasn't been right all year long? Something that is broken. Because something has gone wrong, and much as we'd like to blame society, schools, churches, families or each other, what's really broken is our hearts. Copies of Esther's newly released Christmas devotional will be available for purchase.
