MULTIPLICATION X MANIA Workshop!

Are you eager to give your child a jump start in math?

Sharpen their understanding of multiplication concepts and facts in a supportive, energetic setting! Participants will jump into a host of fun projects that incorporate artistic design, musical strategies, kinesthetic exercises and a variety of activities designed to strengthen your child's fluency with multiplication facts. The workshop also comes complete with daily practice objectives to solidify the skills we learn during each session.

SCHEDULE

Monday through Friday

3:05 - 4:15pm

\$200

Each session includes a snack break!

SESSION 1: February 24th - March 7th

Grades 4 & 5 We will focus on fact mastery and fluency (speed and accuracy) as well as reinforcement of the multiplication and division algorithms.

SESSION 2: March 31st - April 11th

Grades 2 & 3 We will focus on introductory multiplication concepts and basic facts to support students' skill development and to provide a foundation they can continue building on in the classroom.

*Choose the session
to register your child.*

[Session 2 - Grades 2 & 3](#)

WHY DOES THIS WORKSHOP MEET EVERY DAY?

*Fact acquisition is developed through repeated, frequent encounters with the information.
This clinic will best serve your child if he or she is able to work this practice
into a routine by meeting every day.*
