Mathematics: Campers will work alongside their teacher and peers to complete the summer math packet which is due upon arrival to school in the fall. This time will serve to sharpen the students' skills and understanding as well as providing a timely refresher for many foundational concepts they will need upon entering sixth grade Math. Math sessions are led by [Brooke Baker](#).

Language Arts: Together, we will work toward a strong finale for [Language Arts](#) the assignment that accompanies our summer reading. Students are required to have finished reading [The Bronze Bow](#) by Elizabeth George Speare before attending camp. We will also include time to sharpen grammar skills through practice and activities. Language Arts sessions are led by [Kelly Christensen](#).

We will also play games, take breaks to eat a snack and lunch together, and do some fun activities to keep us moving and savoring the summer!
